|----------|-----------------------------------|----------------------------------------|-------------|
| B.E(CSE) | Sri Eshwar College of Engineering | CGPA : 8.16 (Upto 3 <sup>rd</sup> sem) | 2024 - 2028 |
| HSC      | Noble.Matric.Hr.sec.school        | 81%                                    | 2022 - 2024 |
| SSLC     | Noble.Matric.Hr.sec.school        | 90.2%                                  | 2021 - 2022 |

## INTERNSHIP EXPREIENCE

Completed a MERN Stack Internship, where I developed full-stack web applications using React, Node.js, Express.js, and MongoDB. Gained practical experience in building REST APIs, connecting frontend with backend services.

## SKILLS ACQUIRED :

**Frontend** : React.js, React Hooks

**Backend** : Node.js, Express.js

**Database** : MongoDB Atlas

**Deployment** : Render, Vercel

## PROJECTS

### Voice Control Elevator :

2024

A voice control elevator in which we can operate the lift using voice commands instead of pressing buttons. It allows users to select floors and perform basic functions just by speaking. This system is especially helpful for elderly and physically challenged people. It uses voice recognition technology to improve accessibility and convenience. The system can also include multilingual support for wider usability.

### Secure Pay - QR fraud detection system :

2025

Developed SecurePay, a smart app that verifies QR codes before redirecting users to payment apps, preventing fake payment scams. Each merchant gets a unique, tamper-proof QR stored securely on the blockchain. Built using Flutter, Flask, MongoDB, and Polygon, combining security with a simple user experience. Empowers users to make digital payments confidently while ensuring trust and authenticity in every transaction.

### ParkMate - An automation parking system :

2025

Developed ParkMate, a smart automated parking system that allows users to check parking availability and reserve slots in advance based on their preferred date and time. The platform reduces parking congestion and waiting time by enabling real-time slot booking and efficient parking space management. Built using React for the frontend, Express.js for backend APIs, and MongoDB, providing a smooth and user-friendly parking experience.

**Tech Stack** : HTML, CSS, JavaScript, React, Web speech AI, Express, Node.js, MongoDB

## CODING PROFILES

**Skillrack** : Solved 1200+ problems | Received 15+ certificates | Ranking - 16245 | [Amritha](#)

**Leetcode** : Solved 170+ problems | Ranking - 843,403 | [Amritha](#)

**Hackerrank** : C,C++ Bronze level | [Amritha](#)

**Codechef** : Problem Solver | [Amritha](#)

## CERTIFICATIONS

Mastering Data Structures and Algorithm in C and C++ | [Udemy](#)

2025

NPTEL - Programming in Java | [NPTEL](#)

## ACHIEVEMENTS

**Selfie Hackathon** - Finalist

2024

**Smart India Hackathon** - Semi finalist

2025

## TECHNICAL SKILLS

**Programming** - C | C++ | Java

**Core Concepts** - DS | OOPS

**Web Technologies** - HTML | CSS

**Database** - MongoDB

**Tools** - VSCode | Canva | Excel | PowerPoint | GitHub | Power BI (Beginner)
